

eShotz Ltd

the power behind your message™

eShotz: Totem™

The eShotz: Totem™ has been designed to deliver the right combination of static and dynamic branding elements. The eShotz: Totem™ provides a large graphic panel capable of displaying company logos, images, web site address and product information, all using your own branding and colour schemes. The large graphic panel can be replaced as often as you wish. The biggest advantage of the eShotz: Totem™ is the top mounted 19" TFT display that can show slideshows, web sites, flash demos, video and any other dynamic media. The eShotz: Totem™ is capable of being driven by any computer, which can be placed in the base of the unit.

The eShotz: Totem™ provides significant benefits over simple static banner stands. By design the dynamic content provided by the 19" TFT display draws attention from people many metres away that would not ordinarily have noticed the important message you wish to convey. eShotz: Totem™ is designed to be an impressive marketing tool, with thick 10mm acrylic combined with a shape that provides strength the eShotz: Totem™ is a robust solution you can use over and over. The eShotz: Totem™ can be used at events, meetings, your reception area, in fact anywhere you have an audience.
